SUMMARY

Robotics and Automation Engineering graduate with hands-on experience in the development of autonomous robotic systems, embedded systems, and automation solutions. Worked on projects involving line Tracking robot, RFID-based inventory management, and Cartesian pick-and-place systems using Arduino and embedded C/C++. Skilled in sensor integration, motion control, and hardware-software interfacing. Strong understanding of robotics fundamentals, problem-solving, and system debugging. Passionate about building intelligent automation solutions and contributing to robotics and automation engineering teams. For details, [click here](#).

EXPERIENCE

Artificial Intelligence Intern-Glowlogics

Feb 2026 - may 2026

Artificial Intelligence Internship at Glowlogics, where I gained hands-on experience in Machine Learning, Deep Learning, and Data Analytics. Worked with supervised and unsupervised learning techniques, including Linear Regression, Logistic Regression, Decision Trees, and K-Means Clustering for predictive modeling and data analysis. Developed AI projects using Python, TensorFlow, and Keras, gaining practical exposure to model development, training, evaluation, and real-world AI workflows while strengthening problem-solving and analytical skills.[click here](#)

PROJECTS

Robotics - Altronic

[Github Link](#)

Designed and developed ALTRONIC, an autonomous line-tracking robot for warehouse inventory and shipment management. Integrated RFID, IR, and ultrasonic sensors to enable intelligent navigation, inventory identification, and obstacle detection. Developed embedded firmware in C/C++ using a Finite State Machine (FSM) architecture and implemented PID-based motion control for stable path tracking. Enabled wireless communication for real-time inventory monitoring and data management, contributing to an efficient and automated warehouse operation system.

AI - Supply Chain AI Forecasting System

[Github Link](#)

Designed and developed an AI-powered demand forecasting system to support inventory planning and supply chain decision-making. Implemented and evaluated machine learning and deep learning models, including XGBoost, LSTM, and ARIMA, to address demand uncertainty and inventory management challenges in supply chain operations. The solution analyzes historical sales trends to predict future product demand, enabling better inventory planning and reducing the risk of overstocking or stock shortages. Built a FastAPI-based backend and an interactive Streamlit dashboard for real-time prediction and visualization. Applied data preprocessing, feature engineering, model evaluation, and deployment practices to create a scalable end-to-end forecasting solution.

EDUCATION

Bachelor of Technology in Robotics and Automation Engineering Visvesvaraya Technological University (VTU)	2022 – 2026 CGPA: 8.03/10
Pre-University Education (PCMB) Govindram Seksaria Science PU College	2020 – 2022 64.3%
Secondary School (SSLC) Vanita Vidyalaya English Medium School	2020 66.5%

RESEARCH EXPERIENCE

Research & Analytical Insights: Compensation & Talent Optimization (Nexus Corp Case Study)

Independent Data Analytics Project | Python | Pandas | NumPy | Seaborn

Conducted a data analytics study on employee tenure, salary benchmarks, and performance metrics to evaluate compensation equity and talent distribution and derive actionable workforce insights using Python, Pandas, NumPy, and visualization techniques.

EXTRACURRICULAR ACTIVITIES

Robotics Club Team Coordinator (VTU)

Served as Team Coordinator in the Robotics Club, contributing to robotics projects and competitions including Robo Race, Robo Soccer, Drone Flight, Line Follower, and Robo Sumo events, and participated in technical events at BITS Pilani Goa, KLE Institute of Technology, and other institutes. Gained hands-on experience in real-time debugging and system troubleshooting under pressure. Conducted an Arduino RC kit workshop for juniors, teaching basics of Arduino, electronic components, and circuit connections with the team.

SKILLS

Python, C/C++

Robotics: Arduino, ESP32, Raspberry Pi, Sensor Integration, Motor Control

Machine Learning: Regression, Classification, Clustering (K-Means), Sklearn

Deep Learning: TensorFlow, Keras

Data Analysis: NumPy, pandas, matplotlib, Seaborn

Tools: GitHub, git, VS Code, Arduino IDE, Fusion 360, ABB simulation, Ansys FEA, Arduino IDE

Concepts: PID Control, FSM, REST APIs, Streamlit, Robot Kinematics and dynamic.

CERTIFICATIONS

Johnson and Johnson - Robotics and Controls Job Simulation - (Forage)	Link
Introduction to Generative AI completion badge – (Google)	Link

PERSONAL DETAILS

Father's Name	Shakeel ahmed	Languages	English, Hindi
Date of Birth	23-11-2003	Place	Karnataka, India
